Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 are rejected under 35 U.S.C. 102(b) as being anticipated by Theurer et al. (6,058,628).

Theurer et al. discloses a method for the contactless scanning of a track bed profile, including simultaneously effectuating the scanning and a measurement of any deviation from a desired track level at a location of scanning, recording the track bed profile, and calculating the amount of ballast required for uniformly distributing the ballast, wherein a desired transverse track bed profile is superimposed on the recorded scanned track bed profile (fig. 2) as disclosed in columns 3-4.

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
